
UNIVERSAL.

Problem Statement

The mission of Universal.

Vision for the next 100 years.

Creating the future.

Problem

- Are there problems in society?
- Are they structural problems?
- Are there Universal solutions?

Structural problems

Universe creates structures

Structures create order

Order creates corruption

Corruption necessities new structures

Corrupt structures?

When does government become corrupt?

When does organization become corrupt?

When does individual become corrupt?

When it prioritizes its own survival over other structures.

UNIVERSAL

Lost in structures?

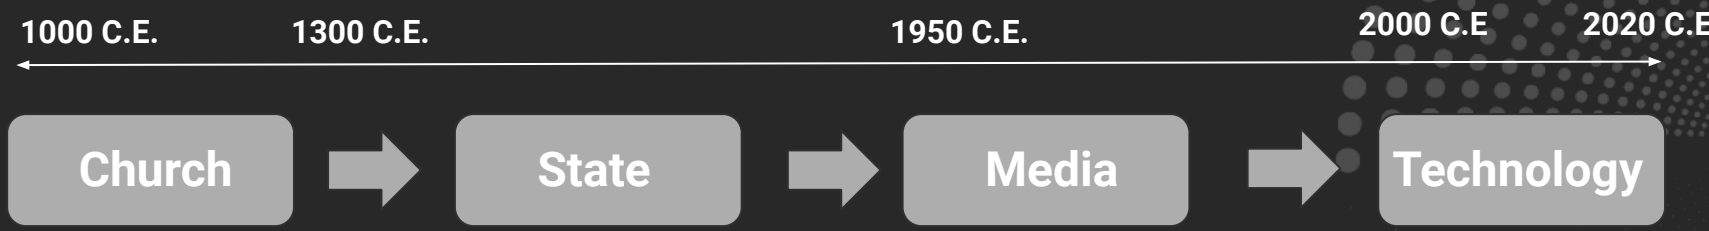
Review of History

I like the dreams of the future better than the history of the past.

Thomas Jefferson

UNIVERSAL

Evolution of power



Self-Disruptive

Decentralized Technology

UNIVERSAL

Future of power

Why self-disruptive?

- Structure that can’t disrupt itself from within, it will become disrupted from outside.

Why decentralized?

- Structure with no center can’t be attacked.
- Decentralized power is incorruptible.

UNIVERSAL

When society improves?

Increase social mobility

Increase productive employment

Empower individuals

Disempower corruption

Our Mission

Create new self-disruptive structures through decentralized technology

Disrupting Organizations

Why organize?

When to organize?

When organizations should stop existing?

UNIVERSAL

Example: Apple Inc.

Visionary Founder: Steve Jobs

Products: iPhone, IPad, Macintosh

Loss of vision after Founder

Evolutionary progress over Revolutionary Progress

Exploits network over improving society

UNIVERSAL.

Zombie organizations

No vision for future

Survival oriented

Swallow startups

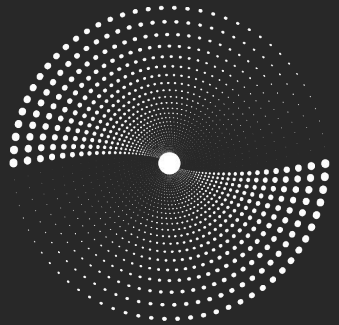
Decreased productivity

Maintain status-quo

UNIVERSAL.

Solution?

UNIVERSAL



UNIVERSAL.

Solution: Universaldot.me

Digital Organizational Transformation

How technology can re-organize society?

DIGITAL TRANSFORMATION

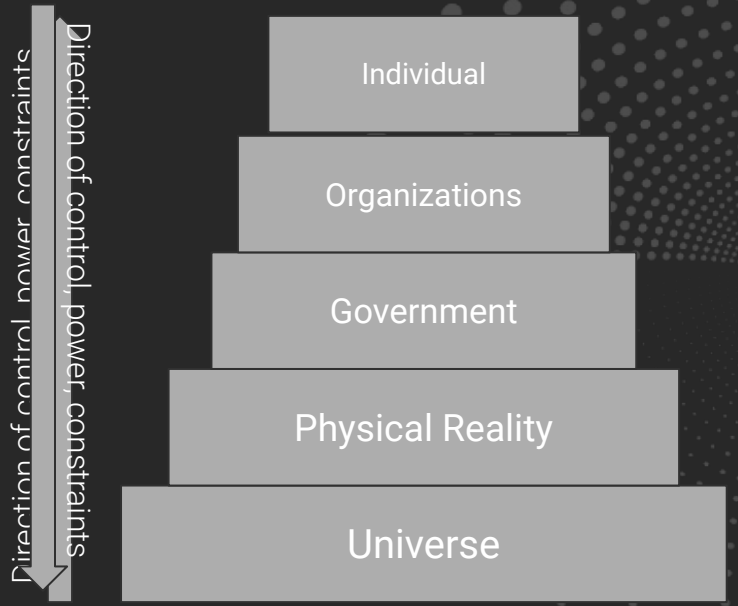
You are not transforming technology.
Technology is transforming YOU.

UNIVERSAL

Structures of abstraction

How to Transform?

- Individually ✖
- Destruction ✖
- Construction ✖
- Inversion ☀



SELF-DISRUPTIVE

DECENTRALIZED TECH

UNIVERSAL

How is it achieved?

Start with the individual

Decentralized app

- Organize people
- Create structures
- Automation

How it works

Individual creates profiles

Profiles creates organizations

Organizations create tasks

Tasks are completed by individuals

Individuals are rewarded by native token of organization

Purpose

Disintermediate all non-productive entities

Get around venture funding

Inspire new visionaries

Create built-in incentive to do productive work

3 Tier Architecture

Presentation Tier

React components

Custom theming SCSS component

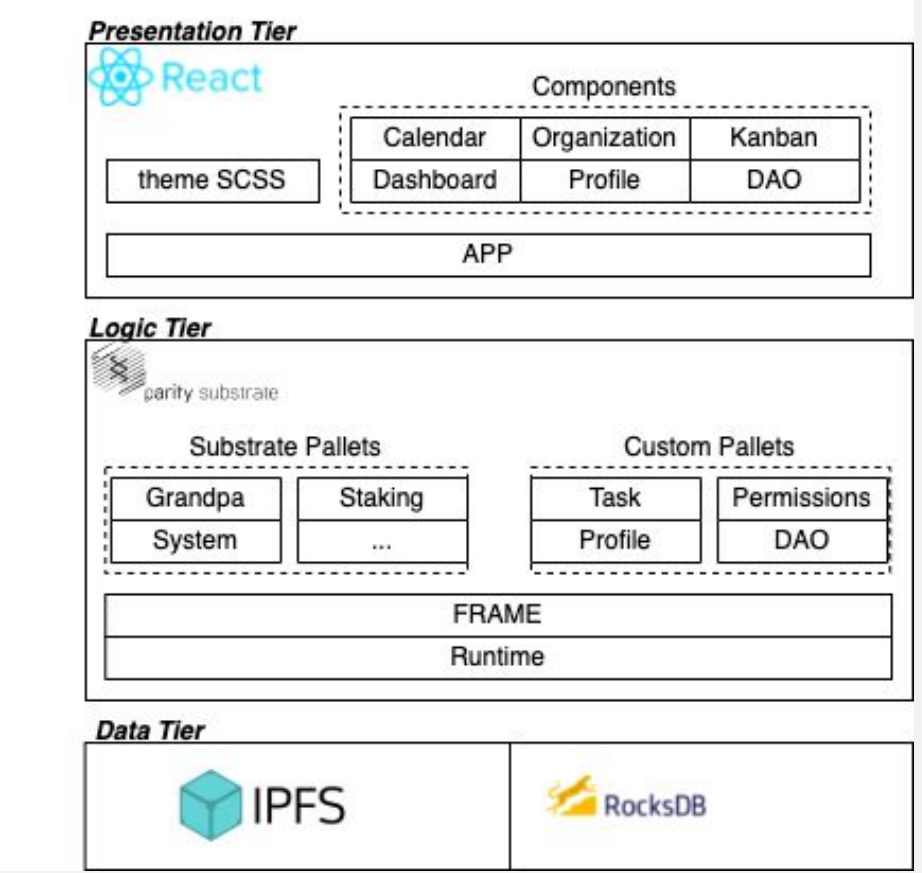
Logic Tier

Custom Pallets

Logic Tier

On-chain storage(RocksDB)

Off-chain storage(IPFS)



Universaldot.me dApp

Features

1. Open Source
2. Decentralized deployment
3. DAO’s
